Dear Sir or Madam,

Our disinfectant **Lerasept® L 420** is effectively tested according to EN 14476 (Quantitative suspension test for the evaluation of virucidal activity in the medical area, phase 2, step 1) against the virus strain *modified vaccinia virus strain Ankara* (MVA). This virus strain was selected by the *Comité Européen de Normalisation* (CEN) as a surrogate test virus covering all enveloped viruses of major importance in the human medical field. On the basis of the effective testing against the recommended virus strain, effectiveness against *Coronaviridae* (Corona-virus) can also be confirmed for **Lerasept® L 420** under the same conditions.

The concentration, time and temperature specified in the technical data sheet must be observed in order to obtain safe effectiveness.

STOCKMEIER Chemie GmbH & Co. KG
